Disclosures	26
-------------	----

Our Story

Corbett Road was founded in 2001 on the premise that the traditional approach to planning and investing isn't always the best approach. While retirement calculators and financial analytics are useful, they often fall short because they do not account for the human element. Simply, they fail to consider YOU.

We pride ourselves on our unique smart**life**™ Wealth Management approach and custom blending of strategic and tactical investment strategies. We believe our approach creates a better opportunity for success and a lasting relationship with our clients.

Our Mission

At Corbett Road, we provide outstanding solutions to our clients using the following mission as our guide:

- » Envision our clients' goals as if they are our own
- » Garner our clients' trust through our actions and knowledge
- » Assist our clients in enjoying the present, but not at the expense of their future

About Corbett Road & Spire

Spire Wealth Management, LLC is the Registered Investment Advisor, and Spire Securities, LLC is the Broker/Dealer for Corbett Road.

Plainly stated, Corbett Road serves as your exclusive point of contact and handles all of the Wealth Management, Investment Management, and Client Service aspects of your relationship. Corbett Road partners with Spire to provide all of the back-office functions necessary to navigate our industry's regulatory environment licensing, and compliance aspects.

- » Investment Management
- » Wealth Management
- » Client Service

- » Regulatory Environment
- » Licensing
- » Compliance

An aerial photograph of a paved road winding through a dense, vibrant green forest. The road is dark asphalt with a white dashed line down the center. The surrounding trees are thick and lush, with varying shades of green. The overall scene is peaceful and natural.

Wealth Management

smart**life**™

It's Nature, Not Numbers

WHY IS smart**life**™ DIFFERENT?

Typical approaches to wealth management, while well intended, typically lack execution and effectiveness because they fail to appropriately account for the most critical element. They fail to account for YOU.

- » A financial plan alone can be insufficient and often becomes obsolete shortly after being created
- » Shortcomings are usually the result of several decisions individuals make that fail to recognize and plan for their attitudes, habits, and natural tendencies
- » There is a significant difference between “having enough” and living a life aligned with your values, beliefs, and goals

Corbett Road believes it is not solely the numbers (financials) that inhibit one's success, but rather their human nature. By taking you, your behaviors, and your values into account, smart**life**™ creates a better experience; an experience that is flexible enough to adjust with you as your life changes and provides differing levels of advice that cater to your needs.

smartlife™ ACCESS

smartlife™ Access is our introductory level into Corbett Road Wealth Services. Our Advisors offer situational client-driven advice and assessment, annual reviews of your accounts, and can be used as a sounding board for all financial matters.

smartlife™ Access offers the following:

- » Regular Reviews
- » Nitrogen
- » Habitudes™
- » Asset Map®
- » How much do I have when? (Monte Carlo & Cash Flow Analysis)

WHAT'S MY RISK NUMBER?

Corbett Road uses Nitrogen to fully understand your view of money and your appetite for risk. This initial step is vital to your future success, as the market can be extremely volatile, causing some to make irrational decisions at the worst possible moment. Understanding the level of risk you are willing to take is paramount in constructing an overall game plan that can weather market storms when they occur.

WHERE ARE YOU TODAY?

It isn't easy to define where you are going without having a firm grasp of where you are and what is impacting you today. Through the use of Money Habitudes™, smartlife™ Access provides you with additional insight into the habits and attitudes that shape your financial picture. Gaining this insight gives you a heightened awareness of the life areas that your habits and attitudes may positively impact.

A SIMPLIFIED FINANCIAL PICTURE IS WORTH A THOUSAND WORDS

Asset-Map® is a visual representation of your current net worth based upon information provided to us. This can be used as a planning tool that helps reveal gaps in your financial picture, but may also serve as a valuable estate planning document to store alongside your Will, Trust, etc. This illustration provides a detailed map of your assets to the executor/executrix of your estate and may make the handling of your financial affairs significantly easier on them.

HOW MUCH WILL I HAVE WHEN...?

The Monte Carlo & Cash Flow Analysis reports depict your current financial picture based upon information provided to us. The Monte Carlo Summary report runs 1,000 randomized simulations of your financial plan against various market conditions and illustrates the potential impact of varying investment returns of your financial future. The Cash Flow report demonstrates the longevity of your assets based upon your annual net cash flow.

smartlife™ FOUNDATION

smartlife™ Foundation builds upon the features of smartlife™ ACCESS by providing a holistic financial plan of your current financial state and a look into your financial future. The plan will highlight current strengths and weaknesses and provide guidance to help you reach your goals.

smartlife™ Foundation is designed to provide the bedrock for building a new financial future. The plan will cover the following areas:

- » Budget & Cash Flow Planning
- » Retirement Income Planning
- » Investment Planning
- » Risk Management & Insurance
- » Liabilities Planning
- » Estate Planning
- » Tax Planning

Corbett Road charges an hourly fee for planning services rendered through smartlife™ Foundation. Most plans require 4-8 hours of work by our Advisor and Planning Team. The length of time to complete a plan will vary, based upon the interaction of the Advisor and Client and the availability of financial information supplied to Corbett Road.

Asset Map

The following is a visual representation of your current net worth based upon information provided to us. This can be used as a planning tool that helps reveal gaps in your financial picture, but may also serve as a valuable estate planning document to store alongside your will, trust, etc. This illustration provides a detailed map of your assets to the executor/executrix of your estate and may make the handling of your financial affairs significantly easier on them.

smartlife™
WEALTH

Having too many priorities, not enough time, or a lack of self-discipline, often results in going through the daily motions and experiencing life through a reactionary lens. You still have goals that you think about and want to accomplish, but too often, you find yourself pushing those goals to tomorrow's "to-do" list and reacting to life as it comes at you, one day at a time. This can often be the difference between experiencing the life you envision and the plan or goals you have set for yourself going unmet.

What you do today makes a significant difference. Your thoughts and actions impact your life, the lives of those you care most about, the community that surrounds you, and the way you will be remembered.

Each day presents an opportunity for you to make a decision that supports the life you envision. Rather than settling for the "good life", let us help you build an extraordinary one.

Our smartlife™ Wealth experience provides all of the features of Access and Foundation, but also provides active coaching, accountability, education, and planning throughout the year.

“The measure of who we are is what we do with what we have.”
–Vince Lombardi

Corbett Road’s smartlife™ Wealth experience helps you create your vision, overcome roadblocks, and execute on your life goals in three phases:

Investment Management

Corbett Road offers asset allocation^{1,2}, active, hybrid, and tactical solutions³. This enables our firm to cater to your specific needs or preferences.

Passive Solutions

Asset Allocation is an investment approach that aims to balance risk by dividing assets among major categories such as cash, bonds, and stocks. Furthermore, the goal is to divide your investment dollars among asset categories that do not all respond to the same market forces in the same way at the same time. While one asset category increases in value, another may decrease or may not increase as much. The risk-return tradeoff lies at the core of this approach.

Active Solutions

The active strategies seek long-term growth of capital. They are designed to remain fully invested throughout the economic cycle and weather market volatility, with the goal of generating alpha through stock selection.

Select Q – This strategy selects stocks from the Nasdaq-100 Index[®] using a multi-factor screening tool to identify high-quality, high-growth businesses exhibiting positive earnings momentum.

Opportunity – This strategy combines top-down macroeconomic research with a bottom-up fundamental approach to individual stock selection. The top-down analysis guides portfolio positioning while stock selection seeks to incrementally add to potential returns.

Dynamic ETF – This strategy selects investments based upon the firm's analysis of the market cycle and seeks to capitalize on trends among certain styles, factors, and industries that are expected to outperform during different stages of the cycle.

Core Equity – This strategy selects stocks from the S&P 500 Index using a multi-factor model that seeks to identify US large-cap businesses with industry-leading scale, operating efficiency, and earnings momentum.

1. Asset allocation strategies and diversification do not ensure a profit or protect against loss.
2. Investments in securities and other instruments involve risk and will not always be profitable.
3. Tactical investing is generally more complex and may involve higher or different risks than standard long-term (strategic) investment strategies.
4. Portfolio allocations are subject to change

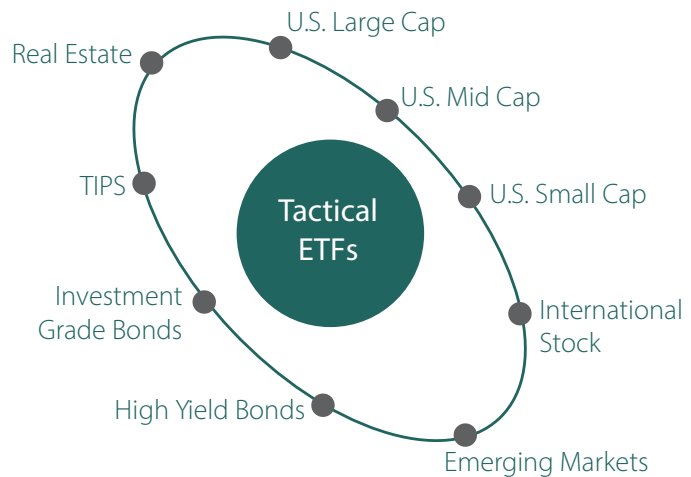

Hybrid Solutions

The **HELIX** Series

Specifically designed for taxable accounts, the HELIX Series combines tactical and passive solutions in an effort to capture the risk reduction benefits of tactical management in a tax-efficient manner.

This is accomplished using actively managed, tactical ETFs, which form the foundation of the HELIX Series. Our investment team constructs an asset allocation model around the tactical component using 8-15 broadly diversified ETFs. The growth and risk objectives of the strategy are tailored toward your targeted allocation, which is determined by your specific risk tolerance. This combination results in a solution that delivers the active advantages of tactical exposure, paired with the diversification benefits of asset allocation, all within the tax-efficient structures of ETFs.

Buffered Outcome Strategies

Our Buffered Outcome strategies provide a solution to investors that find experiencing losses to be more difficult than missing out on potential gains. These strategies utilize exchange-traded funds (ETFs) that seek to provide investors with returns linked to the performance of an underlying index(es), while also offering a degree of downside protection over a specified time period.

These ETFs function by setting a specific level of downside protection (or buffer), which may vary based upon the provider, but typically ranges between approximately 5-25% of the fund's value. This downside protection is achieved by using FLEX option contracts, which help to limit the amount of losses the fund incurs in the event of a market downturn. If the fund experiences a loss within the specified buffer, the fund will absorb the loss the investor incurred. However, for any losses that exceed the specified buffer, the investor will experience the full extent of the loss. Conversely, the upside participation is provided by the fund capturing growth opportunities in up markets, subject to a predetermined maximum cap.

Tactical Solutions

Our **smarttactical™** Strategies enable your overall portfolio to be more adaptive to changing market environments. These strategies have the ability to invest in any exchange traded asset class and are not restricted by market cap, sector, or geographic location. They may also hold a substantial fixed income or cash position based upon our **macrocast™** or **microcast™** indicators.

macrocast™

- V Valuation
- I Inflation
- T Technical Analysis
- A Aggregate Economy
- L Liquidity
- S Sentiment

microcast™

- T Technical Analysis
- U Underlying Market Breadth
- M Momentum
- S Sentiment

Bringing Corbett Road Strategies Together

crfusion™ is the ability to blend Corbett Road strategies into a custom portfolio solution. By combining tactical, active, and passive strategies we are able to establish guardrails around a client’s maximum and minimum allocation targets. This creates a more customized and targeted solution that considers both the positive and negative fluctuations that occur throughout a market cycle. The underlying goal of **crfusion™** is to enable us to compete with an established benchmark when the market is considered “healthy”, but also provide a mechanism of defense when the market faces significant recessionary pressure.

Passive Strategies

Passive strategies are designed to maintain their allocation regardless of market conditions.

Active Strategies

Active strategies remain fully invested, but will change the underlying investment based on fundamental analysis.

Tactical Strategies

Tactical strategies have the ability to shift the allocation more favorably to stocks, fixed income, or cash at any time depending upon the health of the market.

crfusion™

crfusion™ allows a client to invest in a customized and targeted solution that considers both the positive and negative fluctuations that occur throughout a market cycle.

Meet **Our Team**

C. Scott Airey, CFP[®], MBA
Chairman

703.748.5831 | scott.airey@corbettroad.com

Scott serves as Chairman to Corbett Road and is a member of the Corbett Road Investment Committee. Prior to founding Corbett Road, Scott was a Branch Manager at Charles Schwab and began his financial services career at Legg Mason Wood Walker. Spire Wealth Management, LLC Client Relationship Summary (Form CRS)

Item 1 Introduction

Spire Wealth Management, LLC is registered with the Securities and Exchange Commission as an Investment Adviser. Investment advisory services and compensation structures differ from those of a registered broker-dealer, and it is important that you understand the differences. You should carefully consider which types of accounts and services are right for you.

Free and simple tools are available to research firms and financial professionals at www.Investor.gov/CRS. The site also provides educational materials about broker-dealers, investment advisers and investing.

Item 2 Relationships and Services

What investment services and advice can you provide me? We provide investment advisory services, through our investment advisory representatives ("IAR") including discretionary and non-discretionary investment management and financial planning and consulting services to individuals, trusts, and estates (our "retail investors").

When a retail investor engages us to provide discretionary or non-discretionary investment management services we shall monitor, on an ongoing basis, no less than quarterly, the investments in the accounts over which we have been granted authority as part of our investment management service. Furthermore, when engaged on a discretionary basis, we shall have the authority, without prior consultation with you (unless you impose restrictions on our discretionary authority), to buy, sell, trade, and allocate the investments within your account(s) consistent with your investment objectives. When engaged on a non-discretionary basis, the retail investor makes the ultimate decision regarding the purchase and/or sale of investments. Our discretionary or non-discretionary authority over your account(s) shall continue until our engagement is terminated. We also offer model asset allocation portfolios through our Investment Supervisory Services program. Some of our IARs offer Proprietary Model Portfolio Strategies. We also provide services wherein we may select independent third-party managers to manage your portfolio. This includes a Wrap-Fee program offered through one of our custodians. We monitor the performance of the third-party asset manager on an ongoing basis.

When a retail investor engages us to provide financial planning and consulting services as part of the investment management engagement, we rely upon the information provided for our review and do not verify or monitor any such information while providing this service. We do not limit the scope of our investment advisor services to proprietary products or a limited group or type of investment. While we do recommend clients to maintain a minimum asset level of \$25,000, there is no account minimum. We may group certain related client accounts for the purpose of determining your advisory fee. For additional information including minimum investment amounts, please see www.SpireIP.com for our Form ADV Part 2A, brochure (Items 4 and 7 of Part 2A)

Conversation Starters:

Given my financial situation, should I choose an investment advisory service? Why or why not?

How will you choose investments to recommend to me?

What is your relevant experience, including your licenses, education, and other qualifications? What do these qualifications mean?

Item 3 Fees, Costs, Conflicts and Standard of Conduct

What fees will I pay? We provide our investment advisory services on an ongoing asset-based fee basis. When engaged to provide discretionary or non-discretionary investment management services, we shall charge a fee calculated as a percentage of your assets under our management (our "AUM Fee"). Our annual AUM Fee schedule is negotiable and generally ranges from .02% to 2.25%, depending upon the fee schedule used by your specific advisor. We typically deduct our AUM Fee from one or more of your managed accounts, either quarterly in advance, based upon the prior quarter end balance or monthly in arrears, based on an average daily account balance for the month. Independent third-party managers utilized in managing client accounts and/or our IARs offering proprietary strategies will charge fees separately from our management fee. Additionally, our representatives are compensated based upon the amount of assets that they service; therefore, we have an incentive to encourage you to increase the assets maintained in accounts we manage. Specific information regarding the fees that you will be charged will be disclosed in your Investment Management Agreement ("IMA"). These fees are also described in our Form ADV Part 2A, Item 5.

Because our AUM Fee is calculated as a percentage of your assets under management, the more assets you have in your advisory account, the more you will pay us for our investment management services.

We offer our financial planning and consulting services on either an hourly rate or fixed fee basis, ranging from \$100 to \$500 on an hourly rate basis or on a negotiated fixed fee basis. Prior to accepting your engagement, we will assess the nature and scope of the services requested and negotiate either an hourly rate or fixed fee engagement fee. We may request a retainer upon completion of our initial factfinding session with you. The balance is due upon completion of the plan. You will be invoiced directly from your advisor for financial planning and consulting fees based upon your agreed upon payment schedule.

Other Fees and Costs: Your investment assets will be held with a qualified custodian. For accounts managed outside of a wrap fee program, some custodians charge brokerage commissions and/or transaction fees for effecting certain securities transactions as well as certain processing activities (i.e. transaction fees are charged for certain no-load mutual funds, commissions are charged for individual equity and fixed income securities transactions). Certain custodians may charge an asset-based fee in lieu of transaction-based commissions for transaction costs. In addition, relative to all mutual fund and exchange traded fund purchases, certain charges will be imposed at the fund level (e.g. management

fees and other fund expenses). The custodian's fees are separate from your advisory fee paid to Spire Wealth Management. With respect to clients who have assets allocated to an unaffiliated wrap fee program, client assetbased fees will include most transaction costs and fees to a broker-dealer or bank that has custody of these assets, and therefore are higher than a typical asset-based advisory fee.

Additional Information: You will pay fees and costs whether you make or lose money on your investments. Fees and costs will reduce any amount of money you make on your investments over time. Please make sure you understand what fees and costs you are paying. For more detailed information about our fees and costs please review our Form ADV Part 2A brochure (specifically Item 5) which can be found on our website at www.SpireIP.com.

When we act as your investment adviser, we must act in your best interest and not put our interest ahead of yours. At the same time, the way we make money creates some conflicts with your interests. You should understand and ask us about these conflicts because they can affect the investment advice we provide you. Here are examples to help you understand what this means:

- We receive certain support technologies and/or services from our custodian.
- We receive greater compensation when you place more assets in your account.
- We may not charge a fee on some assets held in your account and therefore have an incentive to hold more assets on which we do charge a fee.

We receive certain support and or services from our custodians such as research and access to their technologies. As participants in the Charles Schwab & Co. or Fidelity Brokerage Services LLC (collectively, and together with all affiliates, "Fidelity") referral programs we may be incentivized to place assets with those custodians. In addition, some of our advisory personnel are separately licensed which allows them to offer commission-based products as well as insurance.

How do your IARs make money? Our IARs are compensated by the payment of the fee collected for the management of your accounts per the terms of the IMA. Certain IARs are separately licensed as registered representatives (RR) of Spire Securities, LLC (an unaffiliated, registered broker-dealer, member FINRA). These individuals can affect separate securities transactions for which they will receive brokerage compensation. Some of our IARs are also licensed insurance agents and receive commissions in connection with insurance product sales.

Additional Information: For more detailed information about our conflicts of interest, please review our Form ADV 2A Firm Brochure (Items 5, 10 & 11).

Conversation Starters:

Help me understand how these fees and costs might affect my investments. If I give you \$10,000 to invest, how much will go into fees and costs, and how much will be invested for me?
What are your legal obligations to me when acting as my investment adviser? How else does your firm make money and what conflicts of interest do you have? How might your conflicts of interest affect me, and how will you address them?

Item 4 Disciplinary History

Do you or your financial professionals have legal or disciplinary history? Yes. We encourage you to visit www.investor.gov/CRS to research our firm and our financial professionals.

Conversation Starters:

As a financial professional, do you have any disciplinary history? If so, for what type of conduct?

Item 5 Additional Information

Additional information about our firm is available on the SEC's website at www.adviserinfo.sec.gov. You may contact our Chief Compliance Officer at any time to request a current copy of your Form ADV Part 2A or our relationship summary.

Conversation Starters:

Who is my primary contact person? Are they a representative of an investment adviser or a broker-dealer?
Who can I talk to if I have concerns about how this person is treating me?
Our Chief Compliance Officer may be reached by phone: (703) 657-6060.

Spire Wealth Management, LLC is a Federally Registered Investment Advisory Firm. Securities offered through an affiliated company, Spire Securities, LLC., a Registered Broker/Dealer and member FINRA/SIPC.

All information is based on sources deemed reliable but no warranty or guarantee is made as to its accuracy or completeness. **macrocast™** and **microcast™** are proprietary indices used by Corbett Road Wealth Management to help assist in the investment decision-making process. Neither the information provided by **macrocast™** or **microcast™** nor any opinion expressed herein constitutes a solicitation for the purchase or sale of any securities, and should not be relied on as financial advice. The phrase "the market" refers to the S&P 500 Total Return Index unless otherwise stated. The phrase "risk assets" refers to equities, REITs, high yield bonds, and other high volatility securities. Past performance is no guarantee of future results.

Risk analysis questionnaire and risk score are provided through Nitrogen. Returns range expectations are derived by taking the individual holdings past performance and projecting returns within 95% probability level.

There can be no assurance that any investment product or strategy will achieve its investment objective(s). Investing involves risk, including the entire loss of principal invested. Diversification neither assures a profit nor guarantees against loss in a declining market.

GARP is an equity investment strategy that seeks to combine views of both growth investing and value investing. Return on Equity is the measure of financial performance calculated by dividing net income by shareholder's equity. Value Methodology seeks stocks that tend to outperform in a specific part of the economic cycle.

Corbett Road Investment Management (CRIM) is a Subchapter S Corporation affiliated with Spire Wealth Management, LLC an independent registered investment advisor. CRIM claims compliance with the Global Investment Performance Standards (GIPS®). Valuations are computed and performance is reported in U.S. dollars. A complete list of composite descriptions is available upon request. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. To obtain a compliant presentation for the associated strategy, please contact us at 703.748.5833 (local) or 888.737.8907 (toll free).

Investing involves risk, including possible loss of principal. Diversification does not ensure profits or prevent losses. The Fund's return may not match or achieve a high degree of correlation with the return of the Index. The Fund is non-diversified; to the extent the Fund's investments are concentrated in or have significant exposure to a particular issuer, industry or group of industries, or asset class, the Fund may be more vulnerable to adverse events affecting such issuer, industry or group of industries, or asset class than if the Fund's investments were more broadly diversified. Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

There is no guarantee that the Sub-Adviser's allocation techniques and decisions will produce the desired results. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities including foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments, relatively low market liquidity and decreased publicly available information. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

A new or smaller fund is subject to the risk that its performance may not represent how the fund is expected to or may perform in the long term. In addition, new funds have limited operating histories for investors to evaluate and new and smaller funds may not attract sufficient assets to achieve investment and trading efficiencies.

Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times.
