

Dynamic MX Strategy

As of **December 31, 2024**

This strategy targets between 17-20 ETF positions and utilizes a core/satellite approach to investing. It can invest in any exchange-traded fund (ETF), and it primarily invests in broad market index ETFs, sector and industry specific ETFs, as well as factor and style focused ETFs. Based on **macrocast™** indicators, this strategy may hold a substantial fixed income or cash position as broader macroeconomic conditions deteriorate and are deemed unfavorable.

Investment Process

Corbett Road's proprietary research vehicle, **macrocast™**, serves as the foundation for the risk allocation across all of our managed strategies. The **macrocast™** Score and its trend work to assess if market conditions are favorable or unfavorable for risk assets.

How is the macrocast™ Score Determined?

Corbett Road examines data across six categories (the VITALS) that we believe impact market conditions. Within the VITALS, we look at more than 20 specific indicators that drive the **macrocast™** Score. These indicators are then assessed and classified as signaling a positive (+1), neutral (0), or negative (-1) trend. The final **macrocast™** Score is the result of the summation of the classified indicators.

Top 10 Holdings¹

Top 10 Holdings	Ticker	Portfolio Weighting

<i>Mod Agg Competitor Avg</i>	1.34	94.99%	12.12%	0.97	-22.82%

Disclosure Information

Performance figures shown "gross" of fees do not reflect the payment of investment advisory fees and other expenses. Net Returns are reduced by the investment advisory fees and any other expenses the client may incur in the management of its investment advisory account. To calculate the net performance for non-fee paying accounts in the composite a fee of 0.95%, which is the highest fee charged to clients in this strategy, has been applied to the client's gross performance. In addition to fees paid to Corbett Road, entities advising mutual funds, exchange traded securities, and pooled investment vehicles, will also charge underlying fees and expenses for managing the investment product. The highest additional fee an investor should expect to pay for an investment in Dynamic would be 9bps (9/100 of 1%). Cost may change overtime due to changes in the fees charged by third party managed ETFs used in this strategy.

'Tactical Competitor Avg' is the US Fund Tactical Allocation (primary benchmark). Tactical allocation portfolios seek to provide capital appreciation and income by actively shifting allocations between asset classes. These portfolios can have material shifts across equity regions and bond sectors on a frequent basis. 'Moderately Aggressive Competitor Avg' is the Morningstar Moderately Aggressive Target Risk TR USD (secondary benchmark). Moderately aggressive allocation portfolios seek to provide capital allocation and income by investing in three major areas: stocks, bonds, and cash. These portfolios typically hold larger positions in stocks than moderate-allocation portfolios. Prior to 9/30/2023, the composite was compared against the Tactical Competitor Avg (primary benchmark) and the Morningstar Aggressive Target Risk TR USD index (secondary benchmark). On 9/30/2023, the secondary benchmark was changed from the Morningstar Aggressive Target Risk TR USD index to the Morningstar Moderately Aggressive Target Risk TR USD, which more closely aligns with our portfolio. The Morningstar Aggressive Target Risk TR USD index returns are not shown in the chart above.

Please see important information, including performance disclosures, at the end of this presentation.

Disclosure Information Continued

General Disclosure

Spire Wealth Management, LLC is a Federally Registered Investment Advisory Firm. Securities offered through an affiliated company, Spire Securities, LLC, a Registered Broker/Dealer and member FINRA/SIPC. Registration with the SEC does not imply their approval or endorsement of any service provided by Corbett Road. This presentation is based on the views of Corbett Road. Other organizations or persons may analyze investments and the approach to investing from a different perspective than that reflected in this presentation. Nothing included herein is intended to infer that the approach to investing discussed in this presentation will assure any particular investment results.

This presentation is not to be considered investment advice and is not to be relied upon as the basis for entering any transaction or advisory relationship or making any investment decision. All investments involve the risk of loss, including the loss of principal. Past performance is not an indicator of future results.

Investors should consider the investment objectives, risks, charges, and expenses of each strategy before making an investment decision. This and other information about the strategies presented, including additional risks, are contained in Corbett Road's Form ADV Part 2 available at <https://adviserinfo.sec.gov/firm/summary/305063>, which you should read carefully before you invest. Additional information pertaining to ETFs used for investment purposes can be found in the prospectus for each ETF.

Gross performance is defined as the performance results of a portfolio before the deduction of all fees and expenses. Net performance is defined as the performance results of a portfolio after the deduction of all fees and expenses that a client or investor has paid or would have paid in connection with the adviser's services to the relevant portfolio, including, if applicable, advisory fees, advisory fees paid to underlying investment vehicles such as MFs and ETFs, and payments by the investment adviser for which the client or investor reimburses the investment adviser. Custodian fees paid to a bank or other third-party organization for safekeeping funds and securities are excluded from the calculation of net performance. Advisory fees charged to Corbett Road clients, are described in Corbett Road's Form ADV Part 2 and Part 3 available at <https://adviserinfo.sec.gov/firm/summary/305063>. Non-fee-paying accounts reflect the deduction of the highest possible fees for each strategy to calculate net performance.

In addition to fees paid to Corbett Road, entities advising mutual funds, exchange traded securities, and pooled investment vehicles, will also charge underlying fees and expenses for managing the investment product.

Investors cannot invest in a market index directly, and the performance of an index does not represent any actual transactions. The performance of an index is not an actual client portfolio which is subject to the deduction of various fees and expenses which would lower returns.

Use of Indicators

Corbett Road's quantitative models utilize a variety of factors to analyze trends in economic conditions and the stock market to determine asset and sector allocations that help us gauge market movements in the short- and intermediate term. There is no guarantee that these models or any of the factors used by these models will result in favorable performance returns. Models used by Corbett Road are reviewed periodically. Inputs, factors, and indicators used in these models are subject to change.

Cash Position

We continue to treat cash as an asset class. As such, unless determined to the contrary by CRCM, all cash positions (money markets, etc.) shall continue to be included as part of assets under management for purposes of calculating our advisory fee. This includes our TX (tactical portfolio strategies) that could experience a substantial shift in cash for short or intermediate time periods. At any specific point in time, depending on perceived or anticipated market conditions and events, we may maintain cash positions for defensive purposes. All portfolios are actively managed and monitored during these high cash allocation periods and may shift back to increased equity and/or fixed income allocations at any time. There is no guarantee that such anticipated market conditions and events will occur. In addition, while assets are maintained in cash, such amounts miss the opportunity for market advances. Depending on current yields, at any point and time, our advisory fee could exceed the interest paid by the client's money market fund.

Dynamic MX Strategy

All information is based on sources deemed reliable, but no warranty or guarantee is made as to its accuracy or completeness. **macrocast™** is a proprietary index used by Corbett Road Capital Management to help assist in the investment decision-making process. Neither the information provided by **macrocast™** nor any opinion expressed herein constitutes an offer to sell or solicitation to buy any securities nor a recommendation to engage in any transaction or strategy.
